---

Advisory No. 121, s. 2023

April 19, 2023

In compliance with DepEd Order (DO) No. 8, s. 2013  
This advisory is issued not for endorsement per (DO) 28, s. 2001,  
but only for the information of DepEd officials,  
personnel/ staff, as well as the concerned public.  
(Visit [www.depedmuntinlupa.ph](http://www.depedmuntinlupa.ph))

**9<sup>TH</sup> HSM: HANEP SA SCIENCE AT MATH**

Attached is DepEd NCR Advisory No. 122, s. 2023, dated April 11, 2023,  
on the above-captioned title, contents of which are self-explanatory, for the  
information and guidance of all concerned.

Participation of public and private schools shall be subject to the no-  
disruption-of-classes policy stipulated in DepEd Order No. 9, s. 2005 entitled  
Instituting Measures to increase Engaged Time-on-Task and Ensuring  
Compliance Therewith.

Moreover, schools are reminded of the “No Collection and No Selling of  
Tickets Policy” stipulated in DepEd Order Nos. 19 and 40, s. 2008 and RA  
Nos. 4206 and 5546.

  
**NERISSA ROXAS-LOMEDA PhD**  
OIC- Assistant Schools Division  
Superintendent

**9TH HSM: HANEP SA SCIENCE AT MATH**

The University of the Philippines Association of Chemistry Majors and Enthusiasts (UP ACME) will conduct the above-captioned activity on May 27, 2023, from 7:00 AM to 5:00 PM at the Bulwagang Tandang Sora, College of Social Work and Community Development, University of the Philippines - Diliman, Quezon City.

The activity aims to:

- promote the appreciation of natural sciences and emphasize its importance in today's society;
- develop academic excellence in the field of Science and Mathematics; and
- build camaraderie and sportsmanship among participants and coaches.

This year's Hanep sa Science and Math (HSM) will bring back its on-ground Quiz Bee competition and will be open to all non-science junior high school students from the National Capital Region (NCR), Region III (Central Luzon), and Region IV-A (CALABARZON).

For more information, please contact:

# University of the Philippines Association of Chemistry Majors and Enthusiasts

3/F Institute of Chemistry Teaching Building  
University of the Philippines - Diliman

upd.acme@gmail.com

5 April 2023

**Wilfredo E. Cabral**  
Regional Director  
Office of the Regional Director  
Department of Education - National Capital Region  
Misamis St., Bago Bantay, Quezon City

Dear Mr. Wilfredo E. Cabral,

Greetings!

## WHO WE ARE

The University of the Philippines Association of Chemistry Majors and Enthusiasts (UP ACME) is a duly recognized, non-partisan, non-religious, non-stock, non-profit, student-oriented organization based in the Institute of Chemistry at the College of Science, UP Diliman. Founded in 1997, the organization has been geared towards the promotion of the study of Chemistry in the Philippine setting through various university-based and community-based projects and events.

As of December 9, 2020, UP ACME is an officially accredited Club for UNESCO. UP ACME continues to take part in promoting the ideals of UNESCO in participating in social development, supporting human rights, and mobilizing science knowledge and has been recognized as an Outstanding UNESCO Club for Science and Technology for two consecutive years. Throughout the years, UP ACME has been developing individuals into scientists and enthusiasts by providing them the opportunities for exceptional leadership skills and further appreciation of the sciences, specifically Chemistry. In line with the goal to strive for academic excellence alongside holistic development, the organization has consistently produced honor students, top-notchers, professors, instructors, leaders, and winners of competitions.

Now in its 26th year, UP ACME continues to attain a legacy of brilliance by transforming every member into honorable servants of the nation. UP ACME is "*where matter meets purpose*".

## EXECUTIVE COMMITTEE

AY 2022 - 2023

**LAIYA ANEKA P. MILLER**  
Chairperson

**NDREI JERICHO B. REGINDIN**  
Vice Chairperson for  
Internal Affairs

**PHIL JUSTIN A. PANGILINAN**  
Vice Chairperson for  
External Affairs

**FRANCES KYLA Q. REYES**  
Vice Chairperson for  
Financial Affairs

**ORD RICHARD B. VERANIA**  
Vice Chairperson for  
Academic Affairs

**JOHN RYAN P. MECHILINA**  
Vice Chairperson for  
Publicity Affairs

**AINE CHLOE A. VELESRUBIO**  
Executive Secretary

*Where matter meets purpose*

## OUR EVENT

In UP ACME's 26th year, we remain dedicated to advancing the field of science and technology, ensuring a greater understanding of chemistry and encouraging a greater appreciation for the sciences. With this, we are proud to present one of our biggest events, the **9th HSM: Hanep sa Science at Math**. This year's HSM is bringing back its on-ground **Quiz Bee competition** and will be open to all **non-science junior high school students** from the **National Capital Region (NCR), Region III (Central Luzon), and Region IV-A (CALABARZON)**. This event has three main objectives:

1. to **promote the appreciation of natural sciences** and emphasize its importance in today's society;
2. to **develop academic excellence** in the field of Science and Mathematics, and
3. to **build camaraderie and sportsmanship** among participants and coaches

The quiz bee will take place on **May 27, 2023** at the **Bulwagang Tandang Sora, College of Social Work and Community Development, University of the Philippines - Diliman, Quezon City**. Following this invitation, you can find more information about the event, including its guidelines and mechanics. This is also stated in the attached competition guidebook.

## OUR REQUEST

With that in mind, we are humbly requesting your office **to issue an advisory by releasing a DepEd Memorandum** for the **9th HSM: Hanep sa Science at Math**. This memorandum, along with our proposal, will be distributed to various high schools so that they may sign up for our event. Furthermore, we are also requesting if we can be provided with a **list of high schools in the National Capital Region (NCR), as well as their contact information**. However, the memorandum alone would suffice. For any inquiries or clarifications, please do not hesitate to contact us through:

Kyla Cristina J. Salvanera  
HSM Steering Committee Co-head

Lyle Issel P. De Guzman  
Junior Faculty Adviser  
Institute of Chemistry

## HANEP SA SCIENCE AT MATH

### Vision

For the past eight years, HSM has taken pride in developing students to be more academically competent and inclined toward the sciences. UP ACME hopes to engage a larger audience in its ninth installment in 2023 in order to continue striving for what we stand for as an organization that encourages an appreciation for the natural sciences and the importance of effective science communication to youth.

### Date and Location

**When:** May 27, 2023 (Saturday)

**Where:** Bulwagang Tandang Sora, College of Social Work and Community Development, University of the Philippines, Diliman, Quezon City

**Time:** 7:00 AM - 5:00 PM

### Target Numbers

- 60 Schools
  - 3 official participants
    - Belonging in Grade 10 and at least 1 in Grade 9
  - 1 coach
  - 1 optional substitute

### Prizes for Winners

Champion, Php 10, 000

First Runner-Up: Php 7,000

Second Runner-Up: Php 5,000

Giveaways from Sponsors

## COMPETITION GUIDELINES

### A. Registration

1. Registration starts on April 03, 2023.
2. Participation in the competition is **FREE** of charge
3. Each participating school is only allowed to send three (3) official participants and (1) trainer or coach. Each student participant must be a bona fide student of the participating school and the trainer/coach shall be a bona fide teacher from the participating school. These can be proven by the presentation of any of the following:
  - Valid identification card of the student/teacher of the current academic year
  - Any government issued ID of the student and/or teacher (Passport, Student's Driving license, Birth Certificate, Postal ID)
  - Professional Regulation Commission (PRC) issued Teacher's License.

- The team may also opt to include one (1) alternate participant to substitute for one of the team members in the event that one of the official participants cannot proceed to the quiz bee due to any valid reason
- Only two (2) delegate teams** can register from the same institution. This will be based on a first-come, first-serve basis: after a team from the same school has been registered, any other team from that institution will be politely rejected.
- Interested schools can register their team by answering the 9th HSM Registration Form: [bit.ly/HSM2023Registration](https://bit.ly/HSM2023Registration) until **April 28, 2023, 11:59 PM**. Only the first 60 teams who registered and submitted all of the requirements found below will be accepted.
- Each participant of a team will be asked to submit a scanned/digital copy of each of the following:
  - Proof of enrollment of all participating students (ID of the current academic year AND certificate of enrollment)
  - Proof of Employment of Coach/Trainer
  - COVID-19 vaccination cards of all participating students and coach/trainer
  - Endorsement letter from the School Principal
  - Signed Parental Consent Form for participants below 18 years old (download here: [bit.ly/HSM2023ParentsConsent](https://bit.ly/HSM2023ParentsConsent))
  - Official School Logo
- Teams are only given until April 28, 2023 at 11:59PM to submit ALL requirements. Failure to submit any lacking requirements is grounds for the cancellation of the team's slot for the competition.
- After confirmation of registration and teams have submitted all necessary requirements, the team will receive a confirmation email and will also be contacted by a team facilitator, who will be the point person between the team and the organizers for the rest of the competition.

#### B. Competition Proper

- The 9th HSM: Hanap sa Science at Math 2023 is a quiz bee competition organized by the University of the Philippines Association of Chemistry Majors and Enthusiasts (UP ACME).
- The primary organizing body of the event is the HSM 2023 Steering Committee, composed of members from UP ACME. The Delegate Relations Officer is in charge of accepting participants and ensuring that all requirements for registration are complied. The Delegate Experience Officer is in charge of the guidelines and mechanics of the event, as well as the monitoring of team facilitators.

3. The competition is open to all public or private non-science junior high schools in the National Capital Region (NCR), Region III (Central Luzon), and Region IV A (CALABARZON). All secondary schools shall **confirm** their interest in participation from **April 28 to May 10, 2023**.
4. The competition shall be held on **May 27, 2023** at the **Bulwagang Tandang Sora, College of Social Work and Community Development, University of the Philippines Diliman, Quezon City**
5. Each participating school shall bring with them the ID of all participating students on the day of the Competition as proof of their enrolment.
6. Any changes in the final list of participants without the knowledge of the HSM 2023 Steering Committee shall be a ground for disqualification.
7. Parents of the students may accompany their children during the competition. Separate seats will be allotted for them to avoid any disturbances during the program.
8. Any review material, laptops, cellular phones and the like are allowed to be brought by the team at the venue. However, bringing any of these materials during the Elimination and Finals Round shall be considered cheating and is a ground for disqualification.
9. The UP ACME and the HSM 2023 Steering Committee reserves the right to modify the rules from time to time whenever they see fit. The participating teams shall be notified of these changes before or during the competition.
10. In case of a tie during the Elimination, or Final Round, the teams who tied will undergo a Clincher Round. Both scores shall be reverted back to zero and the team who will garner the highest points will proceed to the next round and/or be declared the Runner Up/Champion.
11. Each school shall receive a Certificate of Appreciation from the UP ACME.
12. The Top 3 schools that will emerge from the Final Round shall be named as the Second Runner Up, First Runner Up and Champion. Each will be receiving a Certificate of Recognition and a cash prize. Prizes for each are as follows:
  - Second Runner Up      Php. 5,000.00
  - First Runner Up        Php. 7,000.00
  - Champion                Php. 10,000.00

#### COMPETITION MECHANICS

##### A. Elimination Round

1. The Elimination Round shall be in the form of a Multiple-Choice test.

- The Elimination Round shall cover five (5) different categories, namely Biology, Chemistry, Physics, Earth Science and Mathematics.
- Only the three (3) official participants shall be allowed to take the Elimination Round Examination.
- Each exam shall be given separately, with varying time allotted for each. The time allotment are as follows:
  - Chemistry - 30 minutes
  - Earth Science - 15 minutes
  - Physics - 30 minutes
  - Biology - 15 minutes
  - Mathematics - 40 minutes
- Each correct answer garnered by the student shall be equivalent to 5 points, while incorrect answers and no answers will be equivalent to 0 points.
- Each student will be given a Questionnaire and an Answer Sheet. The Questionnaire shall also serve as the participant's scratch paper for computations.
- Each student must answer using the Answer Sheet by shading the circle of their answer using a pen or pencil, which will be electronically checked. Students must properly shade the circle that corresponds to their answer. Incorrect/improper shading may cause the system to not scan the whole Answer Key which may lead to the student's score not being recorded.
- Students must properly fill up all the necessary information on their answer sheet. Incorrect/incomplete information will cause the student to get a technical zero for the subtest.
- Calculators or any computing device will be allowed to be used during this round for all subtests except Mathematics. Calculators will be collected before the Mathematics subtest is administered.
- Any form of cheating committed by one student shall be a ground for disqualification of the whole team.
- Papers submitted late will not be accepted and checked.
- Latecomers, if any, will still be allowed to take the Elimination Exams. However, no time extension will be given to the student.
- The highest scorer for each subtest shall be awarded as "Hanep sa Chemistry", "Hanep sa Biology", "Hanep sa Physics", "Hanep sa Earth Science" and "Hanep sa Mathematics", respectively and shall receive a Certificate of Recognition.

- All scores from all the students in the team will be added. The teams who belong to the upper 50% of those who garnered the highest scores will proceed to the Finals Round.

#### B. Finals Round

- Only the Top 50% of all participating teams will proceed to the Finals Round.
- The scores from the Elimination Round will not be reset. The scores of the Top 50% of all participating teams will be announced and will be their starting points for the whole round.
- There will be 25 questions, 5 questions per category (Chemistry, Biology, Physics, Earth Science and Math) with varying levels of difficulty.
- The subject and difficulty of the questions will be in no particular order, and will be shown before the question is flashed.
- Each team shall place their bid after the question is selected and before the question is read. Each bid will be noted by the assigned Facilitator for the team who will serve as their chaperone for the round.
- Using their starting points, each team will bid the amount of points that they will get for each question. Their bid shall not be lower than 10 and shall not exceed their current points. Their bid must be in increments of 10.
- Each team shall answer using the blackboard and chalk provided. Answers raised in other media such as paper will not be recognized.
- Time allotted for the teams to answer will vary depending on the difficulty of the question. After the time given, all teams shall raise their boards up to be recognized.
- Teams who got the correct answer will gain the amount of points that they bid for the question. For the teams who failed to get the correct answer will incur a demerit equal to half of their bid.
- Teams who fail to follow any specific and explicit instructions for each question shall be considered incorrect unless recognized by the Board of Judges.
- Teams who wish to protest their answer must approach the UP ACME Member assigned to them to notify the hosts of the protest. Once a protest is recognized by the host and the Board of Judges, one representative of the team will approach the stage and may be accompanied by their coach. They will be given a chance to defend their answer and may use supplemental materials if needed. The decision of the Board of Judges is final and irrevocable.

- Protests can only be done before the next question is selected. Protests regarding past questions will not be recognized.
- The top 3 teams who will garner the most points after all the questions will be declared the Second and First Runner Up and the Champion, respectively.
- In case of a tie between the Top 3 placements, a Clincher round shall take place to determine the teams who will proceed. The Clincher round shall consist of three (3) questions and the team who gets the highest score will proceed

#### QUIZ BEE COVERAGE

##### I. Matter

###### A. Atoms, Molecules, and Ions

- Give the history of the development of the structure of the atom.
- Compare and contrast atomic number, mass number and atomic mass.
- Name a compound from the chemical formula.

###### B. Stoichiometry

- Calculate compound's formula/molar mass.
- Convert mass to moles and vice versa, and moles to number of particles and vice versa.
- Solve problems involving percent composition and empirical formula.
- Solve mass-mass or mole-mole stoichiometric problems.
- Identify limiting reactant/s and calculate the theoretical yield and percent yield.

###### C. Chemical Reactions

- Write balanced chemical equations.
- Identify different types of reactions.
- Assign oxidation numbers to species and identify the oxidizing and reducing agents

###### D. Electron Configuration and Periodicity

- Apply the Aufbau principle, Hund's rule and Pauli Exclusion Principle.
- Represent electron configurations using different notations.
- Predict whether an element exhibits paramagnetism or diamagnetism.
- Describe the group trend and period trend for different properties (atomic radius, ionization energies, electron affinity, electronegativity, etc.)

###### E. Chemical Bonding

- Distinguish ionic, covalent and metallic bonding.
- Draw Lewis structures for molecules and polyatomic ions.
- Calculate formal charges

#### F. Molecular Geometry

1. Apply the concept of Valence Shell Electron Pair Repulsion (VSEPR) in predicting and describing the electron group geometry and molecular group geometry of compounds.
2. Describe the polarity of a bond and the overall polarity of the molecule.

#### G. Gases

1. Solve problems involving gas laws.
2. Solve gas mixture problems involving partial pressures and mole fractions
3. Work on Graham's law problems.

#### H. Liquids and Solids

1. Describe, compare, and contrast the types of intermolecular forces.
2. Apply the concept of intermolecular forces to explain solubility.

#### I. Mixtures and Solutions

1. Describe solutions in terms of various units of concentration.
2. Solve problems related to different colligative properties of solutions (e.g. vapor pressure lowering, boiling point elevation, freezing point depression, osmotic pressure).
3. Differentiate colloids from solution and identify various types of colloids.

#### J. Acids and Bases

1. Differentiate Arrhenius, Bronstead-Lowry and Lewis definition of acids and bases.
2. Calculate pH and pOH.
3. Describe and explain how buffers work.

#### K. Organic Compounds and Biomolecules

1. Identify the general classes of organic compounds
2. Draw and name organic chemical structures.
3. Recognize the major categories of biomolecules such as carbohydrates, lipids, proteins, and nucleic acids.

## II. Living Things and Their Environment

### A. Cells

1. Give the history of the development of the structure of the atom
  - a. Identify the different types of microscopes.
  - b. Identify the basic parts of a light microscope and describe their functions.
2. Cell Structure and Components
  - a. Distinguish between prokaryotic and eukaryotic cells
  - b. Describe the structure and functions of the various cellular components
  - c. Explain how substances are transported across a cell membrane.

### 3. Cellular Metabolism

- Describe the processes involved in cellular respiration and photosynthesis.
- Describe the functions of enzymes and coenzymes.

### 4. Cellular Reproduction

- Identify the different phases of the cell cycle and describe the sequence of events that occurs during each phase.
- List the phases of mitosis and meiosis and describe the events characteristic to each phase
- Distinguish between asexual and sexual reproduction.

### *B. Genes & Heredity*

- Use Punnett square to predict genotypic and phenotypic expressions of traits.
- Identify the relevant law of genetics in a particular situation.
- Explain the different patterns of non-Mendelian inheritance.
- Describe how genetic information is organized in genes on chromosomes.
- Outline the process of how protein is synthesized from the information stored in the DNA
- Identify various genetic mutations and their consequences.

### *C. Evolutions*

- Explain the mechanism for evolutionary change proposed by different naturalists.
- Explain how fossil records, comparative anatomy, and genetic information provide evidence for evolution.

### *D. Biodiversity*

- Distinguish among the three domains of life (Eubacteria, Archaea, and Eukarya).
- Classify organisms using the hierarchical taxonomic system
- Describe the characteristics, common features and structures of organisms belonging to each of the five kingdoms (Monera, Protista, Fungi, Plantae, Animalia).
- Describe the structural components of viruses and the mechanism by which they reproduce and infect host cells.

### *E. Ecology*

- Differentiate biotic and abiotic components of the ecosystem.
- Describe the different ecological relationships found in an ecosystem.
- Describe and differentiate the major terrestrial and aquatic biomes (tropical forest, desert, taiga, tundra, lakes, estuaries, etc.)
- Analyze the process of cycling materials in the ecosystem (e.g. water cycle, nitrogen cycle)

#### F. Human Anatomy & Physiology

1. Identify and classify four types of tissues found in the body (epithelial, connective, muscle, and nerve).
2. Describe the components and the function of the integumentary system.
3. Identify each bone in the skeletal system.
4. Classify the different types of joints found in the body (synarthroses, amphiarthroses, and diarthroses).
5. Identify the different types of muscle tissue and their components.
6. Describe the contraction of muscle.
7. Name the major subdivisions of the nervous system and the functions of each.
8. Explain how a neuron transmits a nerve impulse.
9. Describe the structure of the spinal cord and the principal regions of the brain.
10. Classify hormones into their major chemical categories, identify the gland that secretes them, and determine their effects in the body. Classify the different types of blood cells and their functions.
12. Describe the parts of the heart and the stages of cardiac cycle.
13. Name the major blood circulatory routes.
14. List the major and accessory organs of the digestive tract and explain how they function.
15. Name the organs of the respiratory system and describe how each is involved in the process of breathing and gas exchange.
16. Define the function of the urinary system and identify its parts.

### III. Force, Motion, and Energy

#### A. Classical Mechanics

1. Kinematics
  - a. Apply vector notations and operations.
  - b. Solve problems regarding motion in one- or two- dimensions.
2. Newton's Laws of Motion
  - a. Analyze free-body diagrams and solve problems involving forces such as tension, weight, normal force, friction and applied forces.
  - b. Use the concept of Newton's third law to identify force pairs and state the magnitude and direction of each.
3. Work, Energy, Power
  - a. Calculate the work done by a constant force on an object that undergoes displacement.
  - b. Apply the work-energy theorem and law of conservation of energy to solve problems involving energy transformations.
  - c. Calculate the power required to maintain the motion of an object and the work that supplies the constant power.
4. Linear Momentum
  - a. Calculate total momentum of a system of objects.
  - b. Relate impulse to the change in linear momentum.
  - c. Solve problems involving elastic and inelastic collisions between two bodies.

#### 5. Circular Motion and Rotation

- Relate the radius of the circle and the rate of revolution to the magnitude of centripetal Acceleration.
- Apply relations among the angular acceleration, angular velocity, and angular displacement of an object that rotates about a fixed axis.

#### 6. Elasticity

- Analyze situations in which a body is deformed by tension, compression, pressure, or shear.

#### 7. Gravitation

- Determine the force that one spherically symmetric mass exerts on another
- Apply Kepler's three laws of planetary motion to describe the motion of an object in elliptical orbit under the influence of gravitational forces.

#### *B. Fluid Mechanics*

- Apply the relationship between pressure, force, and area and the relationship between pressure and depth.
- Apply Archimedes' principle to determine buoyant forces on an object immersed in a fluid.

#### *C. Thermodynamics*

##### 1. Thermal Expansion

- Analyze the changes in the dimensions of an object when heated or cooled.
- Differentiate the three modes of heat transfer: conduction, convection and radiation

##### 2. Laws of Thermodynamics

- Identify the relevant law of thermodynamics in a given situation.
- Determine whether entropy will increase, decrease or remain the same.
- Calculate the efficiency of a heat engine.

#### *D. Electricity and Magnetism*

##### 1. Electrostatics

- Determine the resulting charge of objects undergoing conduction and induction
- Calculate the magnitude and the direction of the force between charges using Coulomb's law.
- Describe and calculate the electric field and electric potential at the vicinity of a point charge

##### 2. Electric Circuits

- Apply Ohm's law to direct-current circuits to solve for a single unknown current, voltage, or resistance.
- Analyze DC circuits with multiple components in series or parallel connection.

### 3. Magnetism

- Calculate the magnitude and direction of the magnetic force in terms of the charge,  $q$ , velocity,  $v$ , and magnetic field,  $B$ .
- Apply Lenz's law in conceptual problems related to magnetic induction.

### E. Waves and Optics

#### 1. Wave Motion

- Distinguish transverse waves and longitudinal waves, and mechanical waves and electromagnetic waves.
- Apply the relation among wavelength, amplitude, frequency, and velocity for a periodic wave.
- Solve problems related to sound waves.
- Identify the different regions of the electromagnetic spectrum.

#### 2. Optics

- Apply the laws of reflection and the law of refraction.
- Use the mirror and thin lens equation to solve problems involving image formation in mirrors and lenses respectively.
- Apply concepts in color addition and subtraction.

### IV. Earth and Space

#### A. Earthquakes and faults

- Explain how movements along faults generate earthquakes;
- Differentiate the epicenter of an earthquake from its focus
- Differentiate the intensity of an earthquake from its magnitude;
- Explain how earthquake waves provide information about the interior of the Earth.

#### B. Rocks and the Rock Cycle

- Describe and distinguish between igneous, sedimentary, and metamorphic rocks
- Classify rocks according to its properties
- Identify the events involved in the rock cycle

#### C. Volcanoes

- Describe the different types of volcanoes;
- Differentiate between active and inactive volcanoes;
- Explain the phenomenon of volcanic eruption

#### D. Plate tectonics

- Know the characteristics, processes, and landforms along plate boundaries.
- Describe the internal structure of the Earth;
- Describe the possible mechanisms of plate movement; and

### *E. Meteorology*

#### 1. Interactions in the atmosphere

- Discuss how energy from the Sun interacts with the layers of the atmosphere;
- Explain the occurrence of land and sea breezes, monsoons, and ITCZ.

#### 2. Seasons in the Philippines

- Relate the tilt of the Earth to the length of daytime.
- Relate the latitude of an area to the amount of energy the area receives; and
- Know the different weather patterns and seasons in the Philippines.

#### 3. Typhoons

- Explain how typhoons develop;
- Explain how landmasses and bodies of water affect typhoons, and

#### 4. Climate

- Describe certain climatic phenomena that occur on a global level.

### *F. Astronomy*

#### 1. Solar System

- Know the different motions of the Earth (rotation and revolution);
- Know the characteristics of planets in the solar system;
- Describe the occurrence of eclipses;
- Compare and contrast comets, meteors, and asteroids;

#### 2. Constellations

- Know the characteristics of stars; and
- Know the relationship between the visible constellations in the sky and Earth's position along its orbit

## V. Mathematics

### *A. Algebra*

- Solve problems involving algebraic expressions;
- Solve problems involving linear equations in two variables; and,

### *B. Quadratic Equation*

- Solve quadratic equations by: (a) extracting square roots; (b) factoring; (c) completing the square; and (d) using the quadratic formula;
- Solve equations transformable to quadratic equations (including rational algebraic equations);
- Solve problems involving quadratic equations and rational algebraic equations;
- Analyze the effects of changing the values of  $a$ ,  $h$  and  $k$  in the equation  $y = a(x-h)^2 + k$  of a quadratic function on its graph;
- Determine the equation of a quadratic function given: (a) a table of values; (b) graph; (c) zeros; and,
- Solve problems involving quadratic functions.

#### C. Exponents and Radicals

1. Apply the laws involving integral exponents.
2. Simplify radical expressions using the laws of radicals;
3. Perform operations on radical expressions; and,
4. Solve equations involving radical expressions.

#### D. Geometry

1. Identify quadrilaterals that are parallelograms;
2. Solve problems involving parallelograms, trapezoids and kites by applying theorems in geometry;
3. Apply the theorems in geometry to show that given triangles are similar; and,
4. Solve problems that involve triangle similarity and right triangles.

#### E. Trigonometry

1. Use trigonometric ratios to solve real life problems involving right triangles; and,
2. Solve problems involving oblique triangles by applying the laws of sines and cosines.

#### F. Sequences

1. Determine arithmetic means and  $n$ th term of an arithmetic sequence;
2. Find the sum of the terms of a given arithmetic sequence;
3. Determine geometric means and  $n$ th term of a geometric sequence;
4. Find the sum of the terms of a given finite or infinite geometric sequence;
5. Solve problems involving special sequences (e.g., harmonic, Fibonacci);

#### G. Polynomials

1. Perform division of polynomials using long division and synthetic division;
2. Factor polynomials;
3. Solve problems involving polynomial functions and polynomial equations.

#### H. Circles

1. Solve problems on circles;
2. Determine the center and radius of a circle given its equation and vice versa; and,
3. Solve problems involving geometric figures on the coordinate plane.

#### I. Statistics and Probability

1. Calculate the measures of central tendency of ungrouped and grouped data;
2. Find the probability of a simple event;
3. Differentiate permutation from combination of objects taken at a time and vice versa;
4. Calculate a specified measure of position (e.g. 90th percentile) of a set of data; and,
5. Solve problems involving measures of position.
