WILFREDO E. CABRAL, CESO III

Regional Director
DepEd National Capital Region

Dear **Dir. Cabral**:

Greetings!

The Science, Technology, and Society Center under the Faculty of Science, Technology, and Mathematics has proposed to the DOST NCR a project titled: “**Building the Disaster Risk Reduction Management (DRRM) Capability of STEM Teachers in NCR through Development of Learning Activities on Earth Science**”. This proposal has been approved with a budget amounting to **PHP 567, 200.00** and the project duration is from **June 1, 2023 to May 31, 2024**.

The training workshop aims to train teachers in the National Capital Region to teach Earth Science topics, especially disaster risk reduction and management. Specifically, it aims to enhance the teachers’ competencies to teach geological and hydrometeorological hazards and other relevant topics; and develop learning activities, worksheets, and lesson plans for teaching geological and hydrometeorological hazards and other related topics.

The content enhancement program is scheduled on August 8-11, 2023 and will be an in-person event at the Philippine Normal University (PNU) with on-site visits to PAGASA and PHIVOLCS. There will also be an “online kamustahan” on November 2023 to monitor the participants in implementing their Work Application Project and a classroom teaching observation on February 2024 for four (4) selected lesson plans developed by the participants.

In connection to this, the undersigned would like to request fifty (50) Senior High School teachers that would represent each School Division Office (SDO) in the National Capital Region (NCR).

We appreciate your continued support and look forward to your positive response on this potential collaboration.

Very truly yours,

Shila Rose S. Pastor, Ph.D.
Project Lead
