Dear Dr. Andaya,

Greetings of peace!

The Biology Teachers' Association of the Philippines, Inc. (BIOTA Phils., Inc.) is a registered non-stock, non-profit organization dedicated to promoting the science of biology in all its branches, as well as advancing biology education and research. One of its active chapters, BIOTA-NCR, was recently recognized as the 2024 Outstanding Chapter.

As a chapter organization, we have conducted more than 35 webinars and held at least one or two free in-person capacity-building sessions for teachers every year. We also use social media (<https://www.facebook.com/biotancr/>) to celebrate the joy and achievements of being a biology enthusiast through our "Biology Educators of the Month" initiative. The goal is to inspire the next generation by showcasing the work of biology educators and scientists, and to contribute to science literacy. As an organization, we have forged partnerships with various institutions to support programs related to research and reflective teaching and learning practices.

As part of BIOTA-NCR's continuing efforts to support professional growth and promote innovative, learner-centered teaching practices among biology educators. We humbly request your endorsement so that public school teachers in our region may be encouraged to attend and benefit from this initiative. As we relaunch this July our webinar titled "*Smart Games, Smarter Data: Gamified Formative Assessments with AI Precision*" to be presented by Ma'am Emelita C. Baylon and Sir John Christopher Ambong from De

La Salle Santiago Zobel. The webinar will focus on effectively incorporating technology into classroom instruction and utilizing digital tools. It will be held on July 23, 2025, from 4:00 to 6:00 PM.

Teachers may join through the Zoom Meeting link:
